PERSONAL DETAILS

- Total Experience: 6 Years 6 Months
- Current Location: Hyderabad
Flexible: Bangalore, Chennai
- Gender: Male
- Marital Status: Single / Unmarried

TECHNICAL SKILLS

- CCNA R&S
- Network Design & Implementation
- Viptela SDWAN
- Checkpoint Firewall
- PaloAlto Firewall
- Zscaler
- Cisco & Aruba Wireless
- Azure Networking
- Python Automation

LANGUAGES KNOWN

- English
- Hindi
- Telugu

COURSES & CERTIFICATIONS

- CCNA Routing & Switching V3.
- Microsoft Azure Fundamentals AZ-900.

PROFILE SUMMARY

Holding 6+ years hands on experience in cloud Networking actively looking for Infrastructure & cloud technology opportunities.

EDUCATION HISTORY

Graduation

Course: B.Tech (ECE)

College: Visvodaya Institute of Technology and Science, Kavali, Affiliated to JNTU Anantapur.

Year of Passing: 2017

Grade: 70%

WORK EXPERIENCE

Jan 2022 to Present

Senior Network Engineer at Accenture

-Efficiently maintain network connectivity while implementing, integrating, and troubleshooting routers, switches, and wireless access points at both hardware and packet levels.

-Preparing Proof-of-Authority for providing access to client as per client requirement.

-Creating L2, L3 VLAN (Virtual Local Area Network) in one of largest and first SDA implemented site as well as traditional environment and providing Firewall Access to new projects.

-Configuration & troubleshooting of switching and routing protocols like BGP, OSPF, EIGRP, STP, RSTP, VTP, HSRP, VRRP, VRF, OSI, TCP/IP, VPN, IPSEC, VLAN.

-Configuration & troubleshooting of Access-list (ACL)

-Monitoring and managing firewall rule implementations (Check Point), troubleshooting issues, with basic knowledge of Palo Alto Firewalls.

-Excellent understanding of the TCP/IP protocol suite.

-Responsible for monitoring and maintaining network infrastructure spanning four global sites.

-Responsible for analyzing, troubleshooting, and resolving network issues, including performing root cause analysis (RCA).

-Responsible for monitoring and managing routing and switching.

-Responsible for managing and monitoring Cisco AAA servers.

-Configured and maintained WLC (Wireless LAN Controllers) and Access Points.

-In depth understanding of Network ports, NAT, PAT and Access Lists.

-Prepare and update documentation for network configurations and change activities.

-Created and updated SOPs for streamlined operations and knowledge sharing.

-Maintaining ISP (Internet Service Provider) Links &

following up till closure with ISP during the issues times.

- Responsible for implementing Change Requests approved in external CAB meetings across multiple global sites
- Preparing Monthly PPT reports, which include Vendor link uptime status, process up Time status, Monthly tickets raised & closed within SLA and Capacity Planning.
- Troubleshoot wireless issues including roaming, interference, and client connectivity.
- Configured **SSID segmentation** for corporate, guest, and IoT networks.
- Managed Zscaler Internet Access (ZIA) and ZPA, including traffic log analysis, troubleshooting, access provisioning, and policy implementation.
- Provided support for Citrix ADC (NetScaler) load balancers with a focus on SSL certificate management and version upgrades.
- Responsible for ensuring complete SLA compliance in handling network incident management and change management processes.
- Worked on Cisco Nexus 9K switches in both traditional NX-OS and ACI environments, focusing on high availability, scalability, and data center best practices.
- Implemented automated, script-based bulk configuration changes using a restore point tool, ensuring quick rollback and reduced risk during large-scale updates.
- Configured and troubleshoot FortiGate firewall policies, validating policy hits, NAT behavior, and traffic logs to resolve access and connectivity issues.

May 2021 to Jan 2022

Network Engineer at Movate Technologies (Formally CSS Corp).

Oct 2019 to May 2021

NOC Engineer at Tata Communications.

Apr 2018 to Oct 2019

L1 support Engineer at Tech Mahindra
